

Data Sheet

KEY BENEFITS

EASY TO PURCHASE AND REDEEM

Gift Cards can be sold on webstore just like any other item in your catalog and redeemed through the payment process.

MUTIPLE GIFT CARDS ACCEPTABLE

Multiple gift cards can be applied to a single order. Payment methods can be combined, for example partial payment by gift card and the remainder by credit card.

USER FRIENDLY PAYMENT WINDOW

eSource webstore allows users to redeem gift cards from the payment window by entering card number and pin number.

REAL-TIME VERIFICATION

eSource webstore has the ability to check the balance of the gift card before the card is applied.

INTEGRATION

- Microsoft Dynamics GP Sales Order Processing and Credit Card Transaction
- Valutec gift card processing service
- Azox E-Commerce suite

Benefits for your webstore:

- The Valutec interface has allowed you support both our POS interface and the webstore interface when a gift card is used in both retail and online stores
- Customers can check their gift card balances online 24/7
- Great customer appreciation and marketing tool for your business. Enhanced promotional capabilities to drive incremental sales
- Easy-to-handle payment method brings more traffic to your webstore

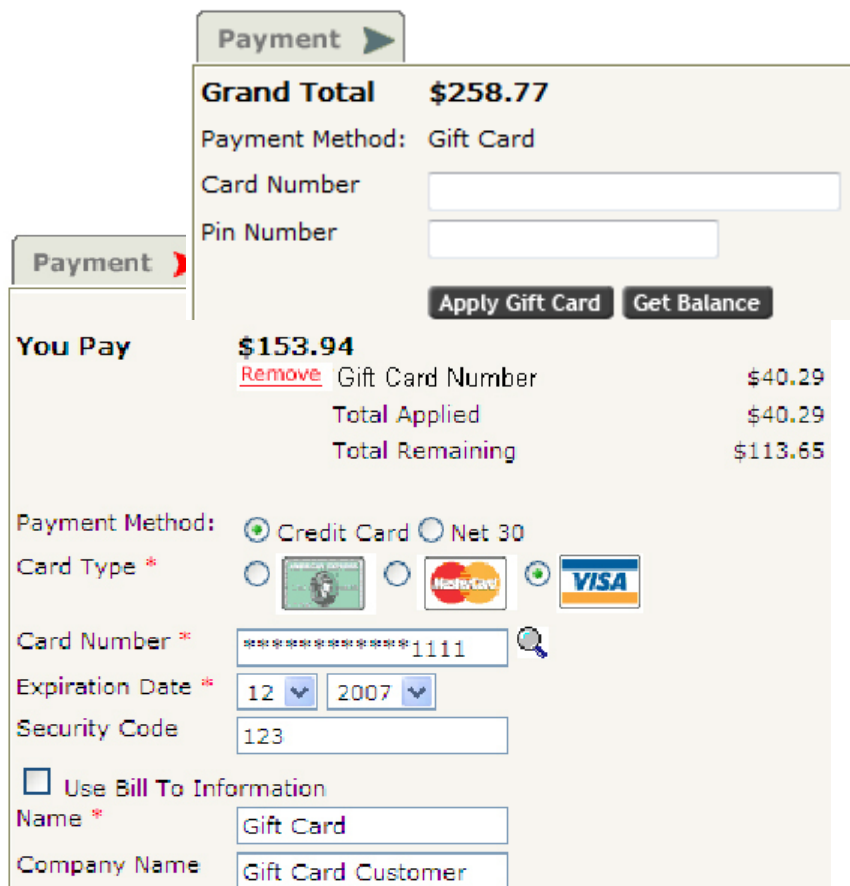

The Gift Card eInterface module provides a link to the Valutec gift card processing service so you can sell and redeem gift cards on the webstore.

The Valutec service will also support the same gift cards in a retail environment. A customer placing an order can use either one or multiple gift cards to pay for the order. If the gift card(s) do not totally cover the full value of the order, a credit card can be used for the remainder of the balance.

Main Features

Gift Cards can be purchased and redeemed on a webstore through the use of the Gift Card eInterface. The Gift Card eInterface uses the Valutec Gift Card Program to support both the physical card and the maintenance of all the data related to the Gift Card.

eSource webstore allows users to redeem gift cards from the payment window by entering the card number and the accompanying pin number. After applying the gift card, the amount on the gift card will be subtracted from the amount of the order. Multiple gift cards can be applied to a single order. Also, payment methods can be combined, for example partial payment by gift card and the remainder by credit card.

The screenshot displays a payment window with the following elements:

- Payment** (dropdown menu)
- Grand Total**: \$258.77
- Payment Method**: Gift Card

| | | |
|--------|------------------|----------|
| Remove | Gift Card Number | \$40.29 |
| | Total Applied | \$40.29 |
| | Total Remaining | \$113.65 |
- Payment Method**: Credit Card (selected), Net 30
- Card Type**: [radio buttons for Discover, MasterCard, VISA]
- Card Number**: *****1111
- Expiration Date**: 12 / 2007
- Security Code**: 123
- Use Bill To Information
- Name**: Gift Card
- Company Name**: Gift Card Customer

TESTIMONIAL

" Our Gift Cards are given away at events, tournaments, as gifts, rewards, or even resold. The Azox Gift Card solution makes it easy to generate the card numbers and track the orders the gift cards are used on. Now we know if we are making money or not. "

Michael P Collins
