Secure Credit Card Processing Software for Microsoft Dynamics GP

Credit Card Extension integrates with multiple gateways providing reliable service and a PCI compliant solution to process credit card and ACH transactions* within Microsoft Dynamics[®] GP. Teaming with industry-leading providers, Azox offers real choices with the flexibility to configure the solution that best fits individual customer needs. Whether creating a new merchant account or maintaining a trusted relationship, Azox Credit Card Extension (CCE) provides the highest levels of security and flexibility available in the industry.

Features include:

- Ability to process credit card transactions within multiple windows
- Provides encrypted storage and retrieval of multiple credit card numbers for each customer in Microsoft Dynamics[®] GP
- Supports multiple merchant accounts for each company
- Allows for partial fulfillment of approved credit card transactions
- Security and gateway setup is maintained on admin site outside of GP.

Get More Out of Your E-Payment Solution

Credit Card Extension allows you to extend and add more functionality to your Enterprise Resource Planning system. With more and more business conducted online companies need to adjust to the demand in web orders. Azox realizes this need and allows for additional features to be easily added on such as fully integrated E-Commerce and online bill pay solutions, which seamlessly connect Azox Credit Card Extension in Microsoft Dynamics GP with Azox online environments.

Features include:

- Instant online pre-authorization for real time on-line credit card processing
- Allows integration of a custom webstore to Credit Card Extension
- Access to online reporting

Help Adhere to PCI Compliance Mandates

Azox Credit Card Extension (CCE) has achieved Payment Application Data Security Standard (PA-DSS) validation and adheres to the Payment Card Industry Data Security Standard (PCI-DSS). By being PA-DSS validated CCE offers the highest security standards to keep sensitive data from being compromised.

Features include:

- Support for AVS (Address Verification Service)
- Support for CVV2 (Card Verification Value) to mitigate fraud risks
- Support for Level 2 and Level 3 Verification
- Allows the use of Gateway Fraud Filter

CUSTOMER SUCCESS WITH AZOX

“Since we don’t have to pay the fee-per-transaction anymore, implementing Azox Credit Card Extension paid for itself in less than five months.”

Sue Christensen
Accounting Manager
Living Essentials

Silver Independent Software Vendor (ISV)

Keep Cardholder Data Safe and Off-Site with Tokenization

With the increased tight security push in recent years, it has become a burden for many small businesses to attain Payment Card Industry (PCI) compliance. Tokenization technology was introduced to alleviate that liability. With Tokenization a merchant no longer has to store sensitive credit card or account number data on its own servers.
